DESCRIPTION

The flange / flangeless drop lens is a led lighting system that exposes the lens with a 1.5" drop from a gypsum or a grid ceiling. This clean, crisp light becomes one with the environment in vertical, horizontal, diagonal and other geometric shapes and forms. The drop lens style system artistically illuminates walls and ceilings in spectacular fashion. Lobbies, hallways and public spaces with never be the same. Complex corners share the spaces, working integrally with the spackle flangeless system.
